

# **Manual blu-ray player samsung bd-e5300**

**Document has moved here →**

## Remote Control

### Tour of the Remote Control

### Installing batteries

#### NOTE

- If the remote does not operate properly:
- Check the polarity (+/-) of the batteries.
- Check if the batteries are drained.
- Check if the remote sensor is blocked by obstacles.
- Check if there is any fluorescent lighting nearby.

#### CAUTION

- Dispose of batteries according to local environmental regulations. Do not put them in the household trash.

## Connections

### A. Connecting to a TV

#### Connecting to a TV with an HDMI Cable - Best Quality

1. Using an HDMI cable, connect the **HDMI OUT** terminal on the rear of the player to the **HDMI IN** terminal of your TV. See page 11.
2. Turn on the player and TV.
3. Press the input selector on your TV remote control until the HDMI signal from the player appears on your TV screen.
4. If this is the first time you have turned on the Blu-ray player, the Initial Settings screen appears. See page 12.

#### NOTE

- An HDMI cable outputs digital video/audio, so you don't need to connect an audio cable.
- If the player is connected to your TV in the HDMI 720p, 1080i, or 1080p output mode, you must use a High speed (category 2) HDMI cable.
- HDMI outputs only a pure digital signal to the TV. If your TV does not support HDCP (High-bandwidth Digital Content Protection), random noise appears on the screen.
- Depending on your TV, certain HDMI output resolutions may not work. Please refer to the user manual of your TV.
- When you connect the player to the TV using the HDMI cable for the first time or to a new TV, the HDMI output resolution will be automatically set to the highest supported by the TV.
- A long HDMI cable may cause screen noise. If this occurs, set Deep Color to Off in the menu.
- If you use an HDMI-to-DVI cable to connect to your display device, you must also connect the Digital Audio Out to an audio system to hear audio.

I recently purchased a Samsung BD-E5300 bluray player which states it has built in WiFi. We set it up and found that the only way to connect to.
