So you've bought your spanking brand new F or H-series Samsung Smart TV, and thought to yourself how great it would be to install some of those on-demand.

Excellent Freeview HD user interface, great handling of digital files from a USB stick, though the provision of just two HDMI.

Great value TV, loaded with features and with a low price, the UE42F5500 is as near to a bargain as you'll find - but it's not perfect. With Smart Hub.
